HUBER Technology – Water Industry Finalist 2018

23.04.2018

The Finalists have been announced for the Water Industry Awards 2018 and HUBER Technology are delighted to have been shortlisted as finalists in two categories;

- **Most Innovative Use of an Existing Technology**
- **Sludge & Resource Recovery of the Year**

HUBER put forward a very strong entry in both categories on the successful Stratford Milcote Sludge DISC Thickener Packaged Plant project.

Part of the outcome solution for the Stratford Milcote Capital Maintenance and Growth Project was the requirement for a single Surplus Activated Sludge Mechanical Thickener. This project used collaboration, challenge and off-site manufacture to develop an innovative technology into a standard product for Severn Trent Water and the wider industry.

The solution saved Severn Trent water 40% capital cost as well as reducing their operational costs by over 20%.

For more information please contact us on Tel. 01249 765000.
