HUBER Disc Thickener at Moreton in Marsh STW

15.08.2014

The RoS 2S size1 Disc Thickener was installed at Moreton in Marsh STW following successful trials of the unit on several Thames Water sites and followed the first permanent disc thickener installation at Burghfield STW.

The unit was delivered through the contractor Black & Veatch and was ordered in April 2007 with commissioning taking place later on in the year.

The thickener is designed for a flow rate of 10 m³/hr of surplus activated sludge at around 0.5 – 1.0% DS thickening it to 5%. The unit is designed to operate around 8hrs per day with minimal operator attendance.

Key features of the [RoS 2S Disc Thickener](#) include:

- Up to 40 m³/h throughput
- Low power requirement
- Two sizes available
- Low maintenance
- Fully enclosed compact design
