HUBER USA – New Headquarters and New Capabilities

05.03.2020

HUBER has been present on the US market since the 1980s. The steadily increasing order intake and legal restrictions motivated HUBER to expand its facilities in the USA. Recently, the American colleagues moved into the new offices and production in Denver, NC.

The journey began in 2016, as HUBER Technology Inc. in USA started searching for a new facility to increase its office space and manufacturing capabilities.

The need to increase manufacturing stemmed not only from yearly increases in order intake but also from local restrictions such as the “American Steel act” and the “Buy American Act.” The patriotic drive was so strong, in fact, that HUBER US began producing and assembling some machinery several years ago. Within the past few years, however, the growth in opportunities stretched the limited space at the current, smaller facility in Huntersville. This strong growth trend forced HUBER US to search for a larger room for its expansion. They finally found the right spot with the right incentives in Lincoln County, in Denver, NC.

Various advantages for the employees also drove the decision to move to Denver. The new location will be reasonably close to the old office building and still around the same distance from Charlotte, with excellent access to all daily needs. As a result of the well-chosen location, none of the employees left the company in anticipation of the move. Additionally, the new facility offers more than 21,000 sqft of office, conference, and training space, and more than 44,000 sqft for the manufacturing, for approximately 75,000 sqft of space.

Now the new building is completed, HUBER US will focus on production for screening products, including the RakeMax® and the WAP®. In time, they hope to be able to produce nearly the full HUBER product range for the US market.

The move from Huntersville to Denver took place the last weekend of February.

HUBER's new head office address in USA:

Huber Technology Inc.
 1009 Airlie Parkway
 Denver, NC 28037

Construction works
