5000 units installed in the UK for HUBER Technology

11.10.2017

After 25 years in the business HUBER Technology have reached a huge milestone. In 2016 the company received a large order from Thames Water for its screens for Hogsmill STW, which will be its 5000th installation in the UK.

HUBER Technology is a leading supplier of stainless steel wastewater treatment equipment, offering high quality innovative solutions for wastewater and sludge for both Municipal and Industrial markets.

The installation is at Hogsmill STW, Kingston Upon Thames where the site is undergoing major re-development and the following HUBER equipment has been selected;

- HUBER Belt Screen EscaMax® x 2
- HUBER Screenings Wash Press WAP® L x 2
- HUBER Sludgcleaner STRAINPRESS®
- HUBER control panels

Following mechanical and electrical installation earlier this year, commissioning is due for completion over the next couple of months.

HUBER Technology celebrated this significant achievement with all the staff at their annual staff meeting in Chippenham and Steve Morris MD congratulated staff for all their continued hard work "HUBER continues to go from strength to strength by adapting products to meet our customers' requirements. Inclusion in this prestigious project at Hogsmill is a testament to the quality of HUBER products and the skill and dedication of all those who deliver them. We look forward to supplying our next 5000 machines!"
