## HUBER Fine Screen STEP SCREEN® SSF

The suitable machine for any application due to variable installation angle

- for high separation efficiencies
- for any flow rate
- easy and reliable screenings transport
- with optional lifting of screenings at channel bottom level

The variable installation angle ensures

- optimal adjustment to individual hydraulic conditions, such as limited upstream levels due to preceding pumping stations
- operating reliability due to tailor-made layout

The STEP SCREEN® System is widely accepted and successful due to its function and easy-to-follow operation principle as well as the simple cleaning method without any aids (self-cleaning effect according to the counter-current principle). It is furthermore easy to maintain and able to handle extremely big screenings volumes whilst it also offers a high operational reliability.

The motor linkage drive has been developed from the well-proven and patented link system. To the benefit of our customers we intentionally avoided difficult-to-maintain chain drives. With the new linkage type we are able to master the occurring bending moments

on the lamellae, especially with high water levels.

## Benefits

### BENEFITS OF THE FLEXIBLE HUBER FINE SCREEN STEP SCREEN® SSF:

- **Functional principle:**
  - Lifting of screenings at bottom level due to a special bottom step design
  - Gentle and complete screenings transport due to the counter-current principle
- **Retrofitting / new plants:**
  - Optimally adjustable to individual hydraulic conditions due to the variable installation angle
- **Flow rate:**
  - High capacity; the flow passes the screen surface only once
- **Separation efficiency:**
  - High separation efficiency due to the narrow slot width and the produced screenings carpet
- **Cleaning:**
  - Self-cleaning effect due to moveable lamellae (no spray water, no brushes)
- **Operational stability:**
  - Reduced susceptibility to grit, gravel and stones due to the bottom step washing system
- **Pivoted screen:**
  - Without the need to remove the subsequent wash press or transport unit
- **Protection against corrosion:**
  - Manufactured from stainless steel and acidtreated in a pickling bath
- **Experience:**
  - Unrivalled for more than 20 years
