HUBER Solutions for Anaerobic Digestion

Huber Technology are a supplier of stainless steel wastewater treatment equipment and offer a wide range of products for enhancing the AD process.

The company's pre-treatment technology can be used for screening, washing oversized material, and removing grit and glass, while its postdigestion equipment is suitable for plastics removal, dewatering, digestate cleaning, and disposal treatment.

We recognise that customers' processes differ, and have a range of pilot plants available for demonstrating Huber Technology on different process streams.

- Pre digestion screens
- Grit removal and treatment
- Sludge import handling
- Oversize washing
- Post digestion screening
- Post digestion dewatering
- Digestate drying
- Filtrate cleaning
